

Cup Warmer

The coffee experience

For the ultimate coffee result, it's essential to prewarm your cups. When no heat is allowed to escape, the aroma can fully develop and you can enjoy your favourite speciality coffee at exactly the right temperature. To avoid wasting valuable energy, it is possible to program automatic switch-on/-off times for the two heating elements in a convenient manner, with integrated temperature monitoring. The cup warmer is designed to match the IMPRESSA-XJ-Line. But it's not only the visual design of the cup warmer that enhances JURA's range of coffee equipment – it also features a modern drawer feeding system so that it closes noiselessly.

Article number Professional Accessory Drawer	69868

Best served hot

For maximum enjoyment, the perfect coffee should be served hot. The coffee aroma develops best when no heat is allowed to escape. The heat is kept in by the two heating elements with integrated temperature monitoring at around 55 °C / 130 °F. The closable drawers keep the precious energy trapped inside, so both the environment and your wallet will thank you!

Time management

The enjoyment of speciality coffees has become a regular part of every day life. This cup warmer is fully in line with this trend, and with its programmable automatic switch-on/-off times you can enjoy the ultimate cup of coffee every time. The machine automatically switches on and off at the programmed times, so the cups are always at the optimum temperature when you need them for the perfect coffee experience.

Silent operation

The cup warmer is fitted with a modern cushioning system so that the two drawers close silently. Each level has space for 6 cappuccino cups (diameter 90 mm), 4 coffee cups (diameter 66 mm), or 5 espresso cups (diameter 57 mm). It's the ideal size for domestic use, so you can spoil your family and friends with delicious speciality coffees.

The ideal addition

The contemporary clean lines of the cup warmer perfectly complement all IMPRESSA-XJ coffee machines from JURA. The translucent side walls of high-quality frosted plastic give it a light, elegant look. Thanks to the new Professional accessory drawer, the cup warmer perfectly matches the height of the IMPRESSA-XJ-Line. It also gives you another compartment for storing your coffee and espresso spoons.
